

Akbar Supia Dirja

DATA VISUALIZATION & WEB DEVELOPER

PROFESSIONAL SUMMARY

I am a Digital Business student experienced in designing interactive dashboards using Looker Studio for various sectors including government, education, transportation, and MSMEs. Successfully handled more than 5 real client projects with complex data requirements. Accustomed to communicating with stakeholders, simplifying data into easily understandable visuals, and experienced in leading and coordinating activities. Open to collaboration, internal training, and team capacity building in the fields of Business Intelligence and data visualization.

PUBLICATION

MBG Sentiment Analysis on Social Media Platform X Using Support Vector Machines and Naive Bayes International Journal of Management, Science and Technology (IJMST) — <https://journal.ilmudata.co.id/view/11800>

CLIENT PROJECT EXPERIENCE

Corporate Trainer, Looker Studio | 2026

National Retail Company

- Designed and led Looker Studio workshops for 15 HR staff members at a national electronics retail company in Jakarta—covering a curriculum ranging from basic data connectivity to interactive KPI reporting visualization.
- Trained the HR team to independently automate reports on performance, turnover rates, attendance, and recruitment — saving dozens of hours of manual administrative work per week.

Freelance Data Visualization Consultant / Looker Studio Trainer | 2026

Self Employed

- Designed a “Collection Insights & Debt Management” dashboard in Looker Studio based on over 500 rows of simulated data, while providing private, hands-on training so the client could manage the collections reporting dashboard independently.

Hajj Pilgrim Health Monitoring Dashboard | 2026

Government Agency for Hajj Health

- Designed a centralized dashboard system to monitor the health conditions of Hajj pilgrims in real-time per flight group (kloter).
- Assisted field officers and leaders in making fast, data-driven decisions based on field data.

Fleet Management & Operational Dashboard | 2026

Transportation Company

- Built Workshop, Analytics, and Reporting modules to comprehensively monitor operational costs.
-

Finance & Budget Absorption Dashboard | 2026

Lazuardi School Educational Foundation

- Designed a dashboard to monitor budget versus actual realization per division, complete with an Ageing List and cost analysis per activity category.

School Administration & Governance Dashboard | 2026

State School Administration Government Agency

- Built an integrated dashboard covering modules for Personnel, Correspondence, Inventory, Activity Monitoring, and Bureaucratic Reform (LHKPN).

ACADEMIC PROJECTS

Full-Stack Web Development | 2026

A'seala Caffe

- Built a serverless e-commerce web ecosystem using React.js, integrated with Midtrans Payment Gateway via Firebase Cloud Functions for real-time digital payments.
- Designed a centralized data management system utilizing Firebase Firestore to synchronize inventory, orders, and sales reports.

Business Intelligence Internship Project | 2024

Distrinesia

- Assisted the Founder in designing an interactive analysis dashboard using Looker Studio to support business decision-making.

ORGANIZATIONAL EXPERIENCE

People Organization Development Division | 2024

Digital Business UIKA

- Contributed to organizational development activities and internal programs.

Coordinator of PDDL & Event Division | 2024

Field Trip Cyber University & BUBARAN DIGSITY

- Managed participant coordination, logistics, field activities, and event execution.
